I actually wouldn't recommend anyone to buy this product as long as manufacturer won't solve some problems.. Poor solution according to high price of the product, looks terrible and covers part of the display.. Sometimes no Bike functions can be set or read although mounted on handlebar holder!?! This is not a real problem, but I'm sure, it could be better: making top speed of 80 km/h for few sec.

Sometimes no Bike functions can be set or read although mounted on handlebar holder!?! This is not a real problem, but I'm sure, it could be better: making top speed of 80 km/h for few sec.. But it works and it's better than losing it (there's no replace-warranty in case you lose it!!!) 2.. Means, you'll see on HAC4 top speed of about 75 km/h, because of 20-sec Recording intervals - so watch display during the ride to get real top speed and good luck, haha.. pdf cm 213c; cm215a pdf cm 215a; cm 21 41 pdf cm 2 1; cm 2 View The User manual Ciclosport CicloMaster CM 434 manual.

ciclomaster cm 212 manual

Here are some problems I had with the Hac4: I've lost HAC4 at almost every landing after (small)jumps on my first ride so I decided to fix it additionally with elastic band.. Although I accidentally dropped it a couple of times, it's still working great and probably the best device for serious cycling! After purchasing the PC-Kit, you're able to see nice graphs of your trip.. Btw, all data is recorded every 20 seconds Onscreen you can then see altitude,speed,temperature,heartrate, and a lot of other info.. And you can compare your route to others (eg to see if you're getting better) I use this device for running, too.. Means, you'll see on HAC4 top speed of about 75 km/h, because of 20-sec Recording intervals - so watch display during the ride to get real top speed and good luck, haha.

Here are some problems I had with the Hac4: I've lost HAC4 at almost every landing after (small)jumps on my first ride so I decided to fix it additionally with elastic band.. Mar 24, 2018 - Ciclomaster cm 208 Manual - Author: Malaya Zaria Country: Libya Cm213c.. After less than a year using it, temp And altitude doesn't work well (shows much too high temperatures and altitudes).. After less than a year using it, temp And altitude doesn't work well (shows much too high temperatures and altitudes).. But it works and it's better than losing it (there's no replace-warranty in case you lose it!!!) 2.. After purchasing the PC-Kit, you're able to see nice graphs of your trip It's interesting to see every traffic light on the computer screen (speed=0).. Poor solution according to high price of the product, looks terrible and covers part of the display.. You also see your heartrate going up when climbing, the number of climbs on your trip. e10c4156f
